President George W. Bush
c/o Mr. Mike Meece
Deputy Director of the Office of Public Liaison
White House
Washington, D.C.

Dear Mr. President:

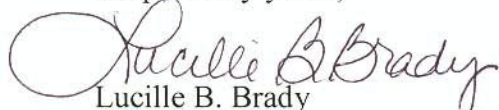

Our company, A-B Computer Solutions, Inc., is a woman-owned, small business providing IT services and computer hardware sales to government agencies, NASA prime contractors, and commercial accounts in Louisiana, Texas, Mississippi and Florida. We have been in business since 1997 and have won awards for our service.

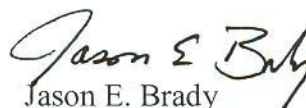

Recently, we visited the website www.rebuildingthegulfcoast.gov also known as the Hurricane Contracting Information Center. The website is extremely well organized and full of useful information. We also took advantage of the phone support offered through 1-888-4USADOC. We were extremely pleased with the courteous and rapid response to our inquiries. We were also most impressed with the knowledge and helpfulness of the contracting representatives staffing the phone service.

In our opinion, this website and phone support would be outstanding tools for those companies that wish to participate in hurricane related federal contracting opportunities. The steps in this process are clear and forthright. If these procedures are followed, while no contract is ever guaranteed, this will allow smaller companies to participate in the contracting activities.

Thank you for taking the time to read our letter. If you have any questions or comments, please do not hesitate to contact us.

Respectfully yours,

Lucille B. Brady
CEO/CFO

Jason E. Brady
President
